Set Up Ansible in a Virtual Environment Named `pathnex`

1. Create a Project Directory (optional)

```
mkdir ansible-env
cd ansible-env
```

---

2. Create the Virtual Environment Named `pathnex`

```
python3 -m venv pathnex
```

---

3. Activate the Virtual Environment

- On **Linux/macOS/WSL**:
- `source pathnex/bin/activate`
- On **Windows (CMD)**:
- `pathnex\Scripts\activate.bat`
- On **Windows (PowerShell)**:
- `pathnex\Scripts\Activate.ps1`

When activated, your shell prompt will look like:

```
(pathnex) $
```

PATHNEX
Shaping Careers, Building Futures

---

4. Upgrade pip (optional)

```
pip install --upgrade pip
```

---

5. Install Ansible

```
pip install ansible
```

✅ Verify Installation

```
ansible --version
```

🛑 Deactivate When Done

```
deactivate
```
